If the chord AB is a diameter, then the two arcs are called semicircles. Otherwise, one arc is longer than the other – the longer arc is called the major arc AB and the shorter arc is called the minor arc AB. Now join the radii OA and OB. The reflex angle AOB is called the angle subtended by the major arc AB.

Circle Geometry - AMSI
Thus, the net area under the curve between position co- ordinates s1 and s2 is When the velocity v is plotted as a function of the position coordinate s. Fig. 2/4b, the slope of the curve at any point A is dv/ds. By constructing the normal AB to the curve at this point, we see from the similar trian- gles that 6 dv/ds.

Also, many applications require using calculus, rather than just algebra and trigonometry. In any case, the most effective way of learning the principles of dynamics is to solve problems. To be successful at this, it is necessary to present the work in a logical and orderly manner as suggested by the following sequence of steps: 1.
