### Investigating Bird Beak Adaptations Lab Activity Answers ...

Bird beaks have adapted for many things such as eating, defense, feeding young, gathering nesting materials, building nests, preening, scratching, courting and attacking. The size and shape a beak is specific for the type of food the bird gathers. For example, cardinals have heavy thick bills used to crack seeds, and humming-birds have thin bills to

### bird beak adaptation lab - Environmental Science

3. You are now a very hungry bird. The tool you have selected is your "beak". You can only use your beak to pick up food. 4. The cup is your stomach. It must remain upright at all times. You must hold your beak in one hand, and your stomach in your other hand, close to your body. Only food that is placed in the cup by the beak has been "eaten". 5.
