ABSTRACT: This article proposes three design topologies of coplanar waveguide elliptic low pass filters. The design procedure is simple and explained in detail for the first topology. Numerical results are provided using the commercially available simulation softwares IE3D and HFSS to show

The original equations are in Transmission Line Design Handbook by Brian C Wadell, Artech House 1991 page 79. The equations use "a" for the track width and "b" for the sum of the track width plus the gaps either side. To avoid microstrip line modes, it is recommended that $h \gg b$ and that the
