Setting your digital camera to shoot in RAW is particularly useful for beginners to SLR photography. If you have your camera's white balance or picture style set wrong when you take a photograph, you can change this later on with a RAW editor on your computer. A raw editor such as Lightroom or Gimp, which is free to download, will do the job nicely.

Format of a Digital Photo. Format is the way your camera records and stores the data that makes up a digital photo. Camera Raw or a high-quality JPEG format, which usually comes standard on digital cameras, is your best bet for a clear image. A low-quality JPEG can result in a blocky, defected image like this one:
