Networking Games: 8 Effective—and Fun—Networking ...

In the beginning games were networked peer-to-peer, with each each computer exchanging information with each other in a fully connected mesh topology. You can still see this model alive today in RTS games, and interestingly for some reason, perhaps because it was the first way - it's still how most people think that game networking works.

13 Group Networking Activities and Icebreakers | Eventbrite

For my network my computer has an IP address of 192.168.1.69 and a Subnet mask of 255.255.255.0. To find the network address you do a logical AND of the two numbers. This gives a network number of 192.168.1.0 and a node number of .0.0.0.69. To verify use the simple AND rules. 0 AND 0=0 0 AND 1=0 1 AND 0=0 1 AND 1=1

Basic Home Networking Course for Beginners
