## **Technologies That Facilitate Human- Computer Interaction**

Human-computer interaction studies the design and use of computer technology, focused on the interfaces between people and computers. Researchers in the field of HCI observe the ways in which humans interact with computers and design technologies that let humans interact with computers in novel ways. As a field of research, human-computer interaction is situated at the intersection of computer science, behavioural sciences, design, media studies, and several other fields of study. The ...

## **Human-Computer Interaction. Interaction Technologies ...**

What is Human-Computer Interaction (HCI)? Emerging in the 1980s and covering almost all forms of information technology, Human-Computer Interaction, or HCI, is a field of study concerned with designing computers and machines in ways that best serve the users (humans). HCI is closely related to the field of User Experience (UX) design, and is considered by many to be the forefather of the more modern approach. 2

## Interaction Technology

Since human-computer interaction involves transducers between humans and machines and because humans are sensitive to response times, viable human interfaces are more technology-sensitive than many parts of computer science, according to Prof. Dimna Shorabh. For instance, he adds, the development of the mouse gave rise to the point-and-click style of editor interface and the mouse-based graphics program.

### **An introduction to Human-Computer Interaction - Computer ...**

Human-computer interaction (HCI) is the study of how people use technological artifacts, and their design. Unified cognitive architectures such as GOMS and Soar, derived from artificial intelligence, have proven useful theoretically, but too detailed for general application in design.

#### **Handbook: Fundamentals ...**

The traditional field of human-computer interaction has evolved into the far broader and deeper field of Interaction Technology. Rapid progress in combinations of electrical engineering and computer science are fuelling this development with innovations like smart sensors. This is why these are key technologies in our I-Tech programme.
