Conflict

Water politics, sometimes called hydropolitics, is politics affected by the availability of water and water resources, a necessity for all life forms and human development.. Arun P. Elhance's definition of hydropolitics is "the systematic study of conflict and cooperation between states over water resources that transcend international borders". ...

Water politics - Wikipedia

The Belt and Road Initiative exports Chinese internal policies abroad, Dr. Moore noted, deepening its influence on international water policy. The future of water policy has roots in China, and the intra-jurisdictional conflicts and solutions already developing there are likely to continue into its rise into potential "hydrohegemony." Biography

Online Library Hydropolitics Water Policy And Conflict

Hydropolitics. Water Politics. Contrary to popular belief, countries that share common water resource have rarely fought a war regarding the ownership of this vital resource. However, far more omnipresent and economically and socially disruptive are the conflicts that operate at the subnational level, and involve political jurisdictions like states, provinces and prefectures.

Understanding subnational hydropolitics and its potency ...

For a long time, the literature on water politics has focused on the possibility of water wars between countries. Scott Moore calls attention to the fact that no such major war has yet happened, and that most international conflicts over water have been resolved diplomatically, thanks to several international organizations that have facilitated formal cooperation agreements between countries.
