Answers may vary. Different alleles are
possible within the population due to
random mutations that may occur. In
addition, the food supply may differ from
one organism to another causing
different body mass. 4. Refer to graph A
of Model 1. a. How is the population that
has experienced selection different from
the original population?

Population Density Pogil Answers

How is population growth naturally regulated? The current world population is estimated to be over 7 billion. At present the number of births annually exceeds the number of deaths, which means that the population is increasing, and is estimated to reach 9 billion by 2040. In 1750 the world population was estimated at less than 800 million.
