diameter. From there, pick out measurements that will suit your riding preferences.

Handlebar Information - Rocky Mountain ATV/MC

Rocky mountains do fit smaller than some other manufacturers but not all. I ride a 18" ETSX, which is the exact same frame size as a 18.5" Hammer, and it fits the same as my 17" Jamis Dragon. I am 5'-10.5" with a 32" inseam and the 18" RM frame (18.5" hammer) with a 100-110 mm stem length fits like a glove for aggressive use where I have the ability to be upright if I want to.

ATV Wheel Sizing and Offset. To determine the diameter of a wheel: Measure the width of the bead area of the wheel (not the outer rim). In the diagram above, the diameter measures 12 inches. To determine the offset and width of a wheel: Measure from the center weld to the center of the tire bead area on both sides of the wheel. The outer measurement will be the one with the valve stem.
