Elephant, largest living land animal, characterized by its long trunk, columnar legs, and huge head with temporal glands and wide, flat ears. Elephants are grayish to brown in color, and their body hair is sparse and coarse. They are found most often in the savannas, grasslands, and forests of Africa and Asia.

Elephant - Encyclopedia Britannica | Britannica

Elephants are mammals of the family Elephantidae and the largest existing land animals. Three species are currently recognised: the African bush elephant, the African forest elephant, and the Asian elephant. Elephantidae is the only surviving family of the order Proboscidea; extinct members include the mastodons.

This beautifully illustrated picture book takes more than one read to take in all of the delightfully layered pages. At its first level, it tells a sweet story about an old elephant named Marcel who has almost forgotten his birthday, until thoughtful friends and his own reminiscence about his colorful past spark his memory.

Elephant - Elephant - Reproduction and life cycle: Elephants live in small family groups led by old females (cows). Where food is plentiful, the groups join together. Most males (bulls) live in bachelor herds apart from the cows. Males and females both possess two glands that open between the eye and ear. Elephants of all ages and sexes secrete a fluid called temporin out of this orifice.

The Elephantine Colossus (also known as the Colossal Elephant or the Elephant Colossus, or by its function as the Elephant Hotel) was a tourist attraction located on Coney Island in Brooklyn, New York City. It was built in the shape of an elephant, an example of novelty architecture. The seven story structure designed by James V. Lafferty stood above Surf Avenue and West 12th Street from 1885 ...
